Did he deserve to die? What sort of stupid question was that? He would have given himself a slap for being so ridiculous if he could. He might just as well ask himself if he was a good father. He needed to think clearly and sensibly. He was scared – no, he was terrified and it was about time he owned up to that. He had to confront what frightened him most – and that was not death itself, but that promised state of creative, relentless, unforgiving pain that would make him beg to be dead and released from his agony. He wished he had been able to give them what they wanted. It would have been so much easier, but that was not possible now. He mentally beat himself with thoughts of his own stupidity. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever. This textbook will help you learn all the skills you need to pass Level 3 and 4 Vehicle Maintenance and Repair courses from City and Guilds, IMI and BTEC, and is also ideal for higher level ASE, AUR and other qualifications.
