Two new chapters have been added to provide additional insight into the accountant's role in litigation, the the focus on investigation makes this book a highly practical reference for any practitioner in the field. The increased need for financial witnesses and consultants to litigators has created plentiful opportunity for accountants, economists, and other practitioners. This book provides clear, comprehensive guidance for each step of the litigation process, to help practitioners enhance their practice in the courtroom and beyond. Leverage financial expertise to provide litigation support services Successfully prove damages with effective investigation techniques Maintain authority while presenting accurate, thorough, and eloquent testimony Get up to date on new technology and Sarbanes-Oxley implementation Litigation support requires a specific skill set and knowledge base, some of which may fall outside of everyday procedure, and all of which continue to evolve with new procedures, tools, and methods. Litigation Services Handbook, 2016 Cumulative Supplement provides the most up-to-date case law and best practices financial experts need to know.

Government Matters Jun 13 2022 "Good government" is commonly seen either as a formidable challenge, a distant dream, or an oxymoron, and yet it is the reason why Wisconsin led America toward welfare reform. In this book, Lawrence Mead shows in depth what the Badger State did and--just as important--how it was done. Wisconsin's welfare reform was the most radical in the country, and it began far earlier than that in most other states. It was the achievement of legislators and administrators who were unusually high-minded and effective by national standards. Their decade-long struggle to overhaul welfare is a gripping story that inspires hope for better solutions to poverty nationwide. Mead shows that Wisconsin succeeded--not just because it did the right things, but because its government was unusually masterful. Politicians collaborated across partisan lines, and administrators showed initiative and creativity in revamping welfare. Although Wisconsin erred at some points, it achieved promising policies, which then had good outcomes in terms of higher employment and reduced dependency. Mead also shows that these lessons hold nationally. It is states with strong good-government traditions, such as Wisconsin, that typically have implemented welfare reform best. Thus, solutions to poverty must finally look past policies and programs to the capacities of government itself. Although governmental quality is uneven across the states, it is also improving, and that bodes well for better antipoverty policies in the future.

Making It Work Feb 09 2022 Low-skilled women in the 1990s took widely different paths in trying to support their children. Some held good jobs with growth potential, some cycled in and out of low-paying jobs, some worked part time, and others stayed out of the labor force entirely. Scholars have closely analyzed the economic consequences of these varied trajectories, but little research has focused on the consequences of a mother's career path on her children's development. *Making It Work*, edited by Hirokazu Yoshikawa, Thomas Weisner, and Edward Lowe, looks past the economic statistics to illustrate how different employment trajectories affect the social and emotional lives of poor women and their children. *Making It Work* examines Milwaukee's New Hope program, an experiment testing the effectiveness of an anti-poverty initiative that provided health and child care subsidies, wage supplements, and other services to full-time low-wage workers. Employing parent surveys, teacher reports, child assessment measures, ethnographic studies, and state administrative records, *Making It Work* provides a detailed picture of how a mother's work trajectory affects her, her family, and her children's school performance, social behavior, and expectations for the future. Rashmita Mistry and Edward D. Lowe find that increases in a mother's income were linked to higher school performance in her children. Without large financial worries, mothers gained extra confidence in their ability to parent, which translated into better test scores and higher teacher appraisals for their children. JoAnn Hsueh finds that the children of women with erratic work schedules and non-standard hours—conditions endemic to the low-skilled labor market—exhibited higher levels of anxiety and depression. Conversely, Noemi Enchautegui-de-Jesus, Hirokazu Yoshikawa, and Vonnie McLoyd discover that better job quality predicted lower levels of acting-out and withdrawal among children. Perhaps most surprisingly, Anna Gassman-Pines, Hirokazu Yoshikawa, and Sandra Nay note that as wages for these workers rose, so did their marriage rates, suggesting that those worried about family values should also be concerned with alleviating poverty in America. It is too simplistic to say that parental work is either "good" or "bad" for children. *Making It Work* gives a nuanced view of how job quality, flexibility, and wages are of the utmost importance for the well-being of low-income parents and children.

The Welfare Marketplace Apr 18 2020 This provocative report examines the trend toward competitive contracting of government functions. By focusing on four jurisdictions that hired private firms to handle welfare-to-work services, *The Welfare Marketplace* reveals the ways in which increased contracting with the private and nonprofit sectors is changing the role and capacity of government, threatening accountability and responsiveness to groups with special needs. Encouraging improved performance through market mechanisms creates particular challenges for the nonprofits who must balance their missions with the bottom line. The organization of service delivery to welfare clients has undergone significant restructuring as a result of the 1996 Welfare Reform Act, which encouraged states to contract with outside companies and for the first time allowed them to determine eligibility for welfare benefits. Seeking to assess the impact of this development, M. Bryna Sanger studied the competitive contract environment in San Diego, Milwaukee, New York, and Houston. Interviewing contractors, public officials, opinion leaders, and researchers revealed the comparative advantages of a variety of key players in the multi-sector service industry. Sanger's conclusions paint a complex picture of how competitive contracting arrangements have changed the ways vendors and government agencies serve their clients. While performance and innovation have improved in some cases, all the players are finding that adequate accountability and contract monitoring are more difficult and expensive than anticipated. Both for profits and nonprofits are quickly draining talent and capacity as they compete for experienced executives from government and from each other. Sanger argues that competitive contracting is here to stay, but it will require more—not less—government management and oversight. She urges scholars and practitioners to develop a more nuanced and sophisticated set of expectations about the costs and benefits of increased market arrangements for service delivery, especially when serving vulnerable populations.

Workforce Development Politics Jul 22 2020 If 88% of Americans believe that education and training resources should be available to the jobless and more than two-thirds of employers have identified workforce and skills shortages as top priorities, why aren't we, as a society, able to provide that training in such a way that it leads to long-term economic security? This book looks at the politics of local and regional workforce development: the ways politicians and others concerned with the workforce systems have helped or hindered that process. Contributors examine the current systems that are in place in these cities and the potential for systemic reform through case studies of Denver, Milwaukee, Philadelphia, St. Louis, and Seattle. Published in association with the Annie E. Casey Foundation.
