It was by far the bloodiest, most dramatic, and longest-running war to take place on Canadian soil. Full of acts of great folly and great courage, and marked by the actions of larger-than-life characters, such as General Isaac Brock and Tecumseh, it left Canadians and Americans with a clearer sense of who they were - or who they were not. It taught the British a lesson on the limits of power, and the Natives on the western frontier lost their last hope of a homeland secure from western expansion. Author and historian Victor Suthren has written a dramatic and informative book on this pivotal moment in our past, unravelling the story of a complex struggle, and bringing the battles and the many fascinating personalities vividly to life. The result is an excitingly written, heavily illustrated, full-colour history. Written to tie in with History TV's mini-series "The War of 1812," this book draws on research done for that television series. Helps students explore, think critically, analyze and have fun with math. Includes solution keys, mini-lessons with background, discussion questions, strategies and demonstrations for solving the problems. **This is the chapter slice "What Is Energy?" from the full lesson plan "Energy"*** Unlock the mysteries of energy! Energy is more than "the ability to do work"; we present these concepts in a way that makes them more accessible to students and easier to understand. The best way to understand energy is to first look at all the different kinds of energy including: What Is Energy, Mechanical Energy, Thermal, Sound Energy and Waves, as well as Light Energy. Our resource provides ready-to-use information and activities for remedial students using simplified language and vocabulary. We also explore other forms of potential energy, as well as how energy moves and changes. Written to grade and comprised of reading passages, student activities and color mini posters, our resource can be used effectively for your whole-class.
