"The best guide to private equity funds. Insight and explanations for both fund sponsors and investors. The gold standard." --Andrew Zalasyn, General Partner and CFO: RRE Ventures Best Practices for Organizing and Managing a Fund With nearly \$7 trillion invested in more than 20,000 funds, investor interest in the private equity

industry has returned, despite the economic turmoil of recent years. Still, guidance about the organization and administration of these funds is tough to find. This 1,400+ page resource, will equip corporate lawyers, investment professionals, and tax practitioners and with best practices to manage these funds effectively. Private Equity Funds: Business Structure and Operations covers a wide range of important issues, such as: the key economic differences between various types of funds; structuring the private equity fund to meet economic expectations and investment goals; securing maximum tax benefits for the sponsor of the fund; duties of the fund's General Partner and Investment Advisor; the major regulatory issues affecting the private equity fund; and much more. Private Equity Funds: Business Structure and Operations reflects the aftermath of the financial crisis of 2007 to 2009. The authors also focus on cyber risk and the compliance obligations of investment advisers. The publication of the James Herriot books led to an upsurge in interest in the veterinary profession among the public and inspired many to study veterinary medicine. However, the veterinary profession has changed markedly since those Herriot days, with many more opportunities for people entering the veterinary field, including such as job prospects in bioscience research, government work, specialization in exotic animal medicine, animal welfare advisory work, international development work, and a whole host of other career options. The landscape of the veterinary curriculum has also broadened considerably, with topics like animal behavior, ethics, business management, client communication, veterinary public health, and clinical skills, alongside clinical veterinary medicine. Authored by a Royal Veterinary College instructor with extensive experience within the veterinary profession and with teaching new students, this book provides a thorough explanation of what prospective students can expect to study at veterinary school, and it discusses career options available to new graduates. Additionally, the book offers a useful overview of current issues in the wider veterinary profession, as well as an honest and thought-provoking discussion of what veterinary life is actually like. It will also be of benefit to qualified vets and agricultural students. [Subject: Veterinary Science, Medicine, Agriculture] Proven Method to Reverse Heart Disease, Beat Diabetes, Weight Loss and Slow Aging. Understanding the Body Organs & The Eight Laws of Health is divided into two sections. The first section simply and concisely explains how the body organs function and how they relate to one another. Dr. Agatha Thrash has spent her career helping people improve their wellbeing thanks to her practical and natural approach to health. A board specialist in pathology, Dr. Thrash has written numerous books about the benefits of charcoal, hydrotherapy, and other home remedies and natural therapies. "Nature's Healing Practices" is an extensive volume that contains a wealth of information drawn from Dr. Thrash's books and her and her associates' years of clinical experience. The book is divided into six sections: Conditions and Diseases, Home Emergencies, Natural Remedies, Herbal Remedies, Dietary Information, Supplemental Information. The first section-Conditions and Diseases-makes up the largest portion of the book and serves as a reference guide for a host of ailments from allergies, Alzheimer's diseases, cancer, and cataracts to headaches, skin diseases, thyroid issues, and women's conditions. Listed in alphabetical order, the various conditions feature case studies, background information, causes, and treatments, including herbal, hydrotherapy, exercise, and dietary suggestions. The rest of the sections provide valuable information how to treat bee stings and other minor home emergencies, how to administer hydrotherapy treatments, what herbs treat what ailments, and what foods to avoid and what foods to eat based on the condition you are battling. Eyewitnesses play an important role in criminal cases when they can identify culprits. Estimates suggest that tens of thousands of eyewitnesses make identifications in criminal investigations each year.

Research on factors that affect the accuracy of eyewitness identification procedures has given us an increasingly clear picture of how identifications are made, and more importantly, an improved understanding of the principled limits on vision and memory that can lead to failure of identification. Factors such as viewing conditions, duress, elevated emotions, and biases influence the visual perception experience. Perceptual experiences are stored by a system of memory that is highly malleable and continuously evolving, neither retaining nor divulging content in an informational vacuum. As such, the fidelity of our memories to actual events may be compromised by many factors at all stages of processing, from encoding to storage and retrieval. Unknown to the individual, memories are forgotten, reconstructed, updated, and distorted. Complicating the process further, policies governing law enforcement procedures for conducting and recording identifications are not standard, and policies and practices to address the issue of misidentification vary widely. These limitations can produce mistaken identifications with significant consequences. What can we do to make certain that eyewitness identification convicts the guilty and exonerates the innocent? Identifying the Culprit makes the case that better data collection and research on eyewitness identification, new law enforcement training protocols, standardized procedures for administering line-ups, and improvements in the handling of eyewitness identification in court can increase the chances that accurate identifications are made. This report explains the science that has emerged during the past 30 years on eyewitness identifications and identifies best practices in eyewitness procedures for the law enforcement community and in the presentation of eyewitness evidence in the courtroom. In order to continue the advancement of eyewitness identification research, the report recommends a focused research agenda. Identifying the Culprit will be an essential resource to assist the law enforcement and legal communities as they seek to understand the value and the limitations of eyewitness identification and make improvements to procedures. This resource serves to educate lawyers and business professionals on how to draft the many types of "boilerplate" provisions, a legal term that refers to the standardized, one-size-fits-all provisions of a contract. Each chapter tackles one of 20 provisions and analyzes why it is important, the key legal and business issues raised, and how to draft the provision to suit a particular transaction. Such analysis not only helps readers better understand how to draft these provisions in their contracts, but also helps them better understand the other party's process. An up-to-date survey of medieval Islamic medicine offering new insights to the role of medicine and physicians in medieval Islamic culture. Previous editions published : 2001 (4th), 1993 (3rd), 1989 (2nd), and 1985 (1st). Georgia Construction Law Handbook follows and unpacks new movement in this area of law as it develops. It is a guide to common construction law issues, such as regulatory matters and the collection of money using the mechanic's lien law or the public works bond laws. A ready reference for attorneys and construction and design professionals, the Handbook analyzes construction law in Georgia, as set forth in the Official Code of Georgia Annotated and reported State and federal court decisions, and includes relevant legal forms. Written by over two dozen experts with hands-on experience, this timely and insightful work explains the benefits--and risks--of securitization, the legal tax, accounting, and other issues involved. Herbs for Pets, by herbalists and holistic experts Gregory L. Tilford and Mary L. Wulff, is the bible for all pet owners looking to enhance their companion animals' lives through natural therapies. Now in its second revised edition, Herbs for Pets is an indispensable resource, an exhaustive compendium of medicinal plants and natural remedies that hosts an illustrated tour through Western, ayurvedic, and Chinese herbs that grow in North America, including their holistic applications and contraindications, and alternative approaches to treating a wide range of ailments. Remedies in the book are applicable to dogs and cats, as well as birds, small mammals, and even farm animals. The book is organized into three chapters, the first is dedicated to the "Principles and Practices of Herbalism," discussing the many facets of herbs, concerns about toxicity, basic herbal preparation, the ethical use of herbs, the connection between herbs and diet, and using herbs as dietary supplements. Chapter 2, titled "Materia Medica: An A-Z Guide to Herbs for Animals," is an exhaustive 150-page section

presenting color photographs and text about the appearance, habitat and range, cycle and bloom season, parts used, primary medicinal activities, strongest affinities, common uses, availability, propagation and harvest, alternatives and adjuncts, and cautions and comments for 65 different herbs (from Alfalfa to Yucca!). The common uses section is extensive for each herb, discussing the nutrient value, various qualities, and ways in which the herb is used for specific treatments. The third chapter of the book is titled "An Herbal Repertory for Animals: Ailments and Treatments" and details remedies for the following: anxiety, nervousness, and behavioral problems; arthritis and hip dysplasia; cancer; cardiovascular problems; digestive system problems; ear problems; elderly animal care; endocrine system and related problems; epilepsy, convulsions, and seizures; eye problems; first aid, immune system care; mouth and nose problems; parasite-related problems; pregnancy and lactation; skin problems; and urinary problems. The third edition of the unparalleled reference on natural ingredients and their commercial use This new Third Edition of Leung's Encyclopedia of Common Natural Ingredients: Used in Food, Drugs, and Cosmetics arrives in the wake of the huge wave of interest in dietary supplements and herbal medicine resulting from both trends in health and the Dietary Supplement and Health Education Act of 1994 (DSHEA). This fully updated and revised text includes the most recent research findings on a wide variety of ingredients, giving readers a single source for understanding and working with natural ingredients. The Encyclopedia continues the successful format for entries listed in earlier editions (consisting of source, description, chemical composition, pharmacology, uses, commercial preparations, regulatory status, and references). The text also features an easily accessible alphabetical presentation of the entries according to common names, with the index cross-referencing entries according to scientific names. This Third Edition also features: More than 50 percent more information than the Second Edition, reflecting the greatly increased research activity in recent years A new section on traditional Indian medicine, with information on nine commonly used herbs More than 6,500 references Two new appendices explaining and illustrating the botanical terminology frequently encountered in the text A revised and expanded index Leung's Encyclopedia of Common Natural Ingredients: Used in Food, Drugs, and Cosmetics, Third Edition will continue to provide a comprehensive compilation of the existing literature and prominent findings on natural ingredients to readers with an interest in medicine, nutrition, and cosmetics. This book was written by Al. Wolfsen, who was given up to die before he was 21 years old. In 1948 he was at the point of death and the medical doctors gave up all hope of recovery. He turned away from medical "science" that offered no help and turned to the remedies found in the Bible and nature. He prayed and promised to work for God as long as he should live. That day he had a "dream" where an angel from heaven came into the room and talked with him and took the disease away. After the "dream", he rapidly recovered. Not forgetting his promise to work for God, as long as he should live, he has taught hundreds of sick people how to use only simple non-poisonous remedies. This comprehensive volume covers ayurveda, aromatherapy, vitamins and minerals, flower essences, Chinese herbal medicine, folk remedies, herbalism and homeopathy. Explains which ailments the therapies treat most effectively.
